SUMMARY

Solutions Engineer with 3+ years of experience turning business requirements into production data and AI solutions on Microsoft Azure, Databricks, and PostgreSQL. Lead technical discovery with business stakeholders, design end-to-end architectures, and take solutions from proof of concept (PoC) to production across multi-site enterprise rollouts. Delivered in-house platforms that avoided Rs. 5 crore in licensing costs and removed approximately 7,300 hours of manual reporting a year. Hands-on with generative AI, including Retrieval-Augmented Generation (RAG), agentic AI, vector databases, and Model Context Protocol (MCP). Pursuing a PGPM (MBA) at IIM Mumbai to add commercial depth to technical solution design.

SKILLS

- **Solutions Engineering:** Technical discovery, requirements gathering, solution design and architecture, proof of concept (PoC), product demonstrations, stakeholder management, technical documentation, build-versus-buy and cost analysis, enterprise rollout
- **Cloud and Data Platforms:** Microsoft Azure, Azure Data Lake Storage (ADLS), Azure Blob Storage, Databricks, Delta Lake, lakehouse and medallion architecture, PostgreSQL, Microsoft Entra ID
- **Data Engineering and Integration:** ETL/ELT pipelines, data ingestion, REST APIs, API design, system integration (SAP, GST, Siemens S7 PLC), data modeling, data quality, data governance, role-based access control (RBAC)
- **Generative AI and Machine Learning:** Large language models (LLMs), Retrieval-Augmented Generation (RAG), agentic AI, embeddings, vector databases, Model Context Protocol (MCP), LangChain, Hugging Face, prompt engineering, PyTorch, TensorFlow, scikit-learn, computer vision
- **Programming and Tools:** Python, SQL, C++, Django, Flask, Pandas, NumPy, Streamlit, Selenium, OpenCV, Git

WORK EXPERIENCE

Assistant Manager – Digitalisation (Data & Solution Architecture)

JSW Infrastructure | Navi Mumbai, Maharashtra | Aug 2024 – Present

- Led technical discovery and requirements workshops with operations, finance, and HSE stakeholders across three port sites, translating business needs into solution designs and phased rollout plans.
- Architected and deployed PortBird, an enterprise port management platform integrating ETL pipelines, SAP and GST APIs, PostgreSQL, Azure Data Lake Storage (ADLS), and Microsoft Entra ID authentication with role-based access control (RBAC).
- Evaluated build versus buy and delivered in-house, avoiding Rs. 5 crore in licensing costs and Rs. 10 lakh per site in annual maintenance across JSW DPPL and JSW JJLTPL.
- Removed approximately 7,300 hours of manual reporting a year by replacing Excel-based Daily Progress Report and MIS compilation at three sites with Python pipelines integrating PortBird, iPortman, and SCMS; delivered real-time vessel-position dashboards and 3D rake views.
- Designed a data acquisition API that lands PostgreSQL data in ADLS for ingestion into the bronze layer of a Databricks medallion lakehouse; owned source configuration, schema definition, data quality checks, and handover documentation.
- Improved data governance across 50+ processes with a Digital Logbook (access controls, data ownership, validation rules) and cut MIS reporting lag to near zero by automating SAP FICO data extraction with Python and Pandas.
- Saved approximately 365 HSE reporting hours a year by automating report extraction from external portals with Selenium.

Graduate Engineer Trainee

JSW Infrastructure | Dharamtar Port, Raigad, Maharashtra | Aug 2023 – Aug 2024

- Designed a weighbridge management system handling 500–800 truck transactions a month, with validated receipts and live dashboards at JSW DPPL and JSW SWPL, avoiding Rs. 1 lakh in licensing costs.

- Replaced paper gate passes with a Python vehicle-entry application for employee, contractor, and heavy earth-moving equipment (HEME) vehicles; integrated camera feeds and face recognition for real-time headcount across 2–5 zones.
- Selected for the GET Excellence Program at MDI Gurgaon (2024), a leadership and business management program for high-potential graduate engineers.

EDUCATION

Post Graduate Programme in Management (PGPM – MBA)
IIM Mumbai | Mumbai, Maharashtra | Jul 2026 – Jul 2028 (Expected)

- Relevant coursework: Microeconomics, Financial Reporting, Optimisation and Decision Techniques, Marketing Management, Managerial Communications.
- Capstone, Supply Chain Agentic AI: built an agentic AI system for supply-chain decision support, using a RAG pipeline with document chunking, embeddings, and vector-database retrieval to ground multi-step agent reasoning in enterprise data.

Bachelor of Engineering (B.E.), Computer Engineering | CGPA: 8.1/10
Ramrao Adik Institute of Technology | Navi Mumbai, Maharashtra | Aug 2019 – May 2023

- Grand Finalist, Smart India Hackathon 2023: built real-time object detection with MobileNet SSD and Haar cascades in Python and OpenCV, plus a deep-learning model for grayscale image colorization.

CERTIFICATIONS

- Anthropic: Model Context Protocol (Introduction and Advanced Topics), Claude Code in Action, Building with the Claude API (2025)
- Hugging Face: AI Agents (2025)
- Udemy: Python and Django (2024)

PROJECTS

- **26AS-to-Excel Converter (Streamlit):** open-source tool that converts Form 26AS tax statements into structured Excel files.
- **ATS Resume Scoring Tool (NLP):** open-source tool that scores resumes against job descriptions using natural language processing.
- **OpenScribe (Chrome Extension):** open-source browser extension.
